

MoveRoll® zero energy receiver

MoveRoll zero energy receiver is used to receive the roll into the slat, chain or belt conveyor, or any other application in which the roll need to be stopped. Equipped with special roll-handling cushions, the zero energy receiver stops the roll gently without damaging the roll quality.

Receiver key data

Length: 1500 - 9000 mm
Width: 705 mm
Height: 333 mm
Weight: 100 - 500 kg

Roll key data

Dia: 3 : 1
Width: 300 - 5000 mm
Weight 200 - 6000 kg

Receiving method

Receiving is controlled by flexible stop element which is actuated by special material. The zero energy receiver can receive one roll at a time and does not require any energy source (* patented method)

Applications

Paper/Tissue roll receiving
Adjustable for different rolling applications
